

Edge-Carry UV Light-Curing Conveyor

The Dymax Edge-Carry Series of conveyors is designed for efficient curing of UV and/or visible light-sensitive adhesives, inks, and coatings. These conveyors can be outfitted with a variety of lamp configurations to address a variety of application specific requirements. They offer complete shielding from UV light and consistent cure times. Configuration options allow flexibility when defining intensity requirements to keep operating costs to a minimum. Standard height clearance is 0.75" across the entire 18" width, which is ideal for low profile parts such as PCBs, and up to 6 inches across a 13.75" width, which can be increased to either 8" or 12" with optional risers installed.

Edge-Carry Conveyor

Edge-Carry Conveyor Full Side View

Edge-Carry Conveyor Curing PCB - Front View

FEATURES	
Complete UV shielding	Built-in variable speed exhaust fan and stack
Controlled and consistent cure times	Can be outfitted with either Dymax EC series or Fusion lamps
Adjustable width to 18"	Accurate digital speed control with readout
Adjustable lamp-to-part distance	Benchtop conveyor

Choosing the Right Lamp(s) for Your Edge-Carry Conveyor

Edge-Carry series conveyors can be outfitted with Dymax 5000-EC, 2000-EC, and 1200-EC lamps, or Fusion F300 lamps.

5000-EC Lamps

These lamps provide moderate intensity (~200 mW/cm²) over a 6" x 6" (approximate) curing area. Their 400-Watt auto-switching power supplies accept 90 to 264 Volts AC and 47 to 63 Hz. With normal use, 5000-EC bulbs will retain 90% of their original intensity after 1,000 hours.

5000-EC lamps are recommended for small-to- medium throughput bonding applications. For faster or more tack-free cures, Fusion F300 lamps are recommended.

Dymax Edge-Carry series conveyors can be outfitted with one, two, or four 5000-EC lamps as shown below.

One 5000-EC lamp
center mounted
6" wide single exposure

Two 5000-EC lamps
center mounted
6" wide double exposure

Two 5000-EC lamps
full-width mounted
12" wide single exposure

Four 5000-EC lamps
full-width mounted
12" wide double exposure

Fusion F300 Lamps

Fusion F300 lamps provide the highest intensity (~2,500 mW/cm²) over a 1" x 6" curing area. These lamps require 208 to 240 Volts AC for operation. With normal use, Fusion F300 lamps retain 80% of their intensity up to 6,000 hours. Fusion F300 lamp systems are recommended where higher energy levels are

necessary to cure coating, potting, and gasketing material applications and when higher process throughput is needed. Edge-Carry Series conveyors can be outfitted with one or two Fusion F300 lamps as shown in the diagrams below.

One center-mounted Fusion F300 for 6" wide exposure

Two Fusion F300 lamp systems for 12" wide exposure

The chain rail width on the Edge-Carry conveyor is easily adjusted to accommodate various parts widths.
