

GLUDITEC
Glue & Dispensing Technology

GC-832V

General Valve Controller

GC-832V controller is a fast, convenient way to adjust valve open time in increments as small as 0.001 seconds, right at the dispensing station. The result is exceptional process control without time-consuming programming or mechanical adjustments that require the production line to be shut down.

FEATURES

- > Microprocessor - based control
- > Time digital display from 0.001~99.99
- > Cycle: 0.05%
- > Unique TEACH function
- > Memory for time recorder

SPECIFICATION

Dimension	215 x 225 x 90mm
Net weight	1.87kg
Air input	0.5 ~ 0.9 bar
Air output	0.01 ~ 0.8 bar
Repeat Tolerance	±0.1%
Min. volume	0.005ml
Speed	> 600 cycles/min
Standard CE Approved	Yes
Dispense time	0.001 ~ 99.99 sec +/-0.1%
Voltage	110V/220V±10% 50Hz
Power Consumption	< 15W
