

VieTape TRC6101

PVC TAPE

CHARACTERISTIC

Soft polyvinyl chloride (PVC) film as backing material with rubber pressure-sensitive adhesive coating. This product is suitable for wire connection winding and electric insulation protection.

PERFORMANCE FEATURES

- As the main insulating layer to protect the wires and junctions up to the voltage 600V.
- Playing a protective role, shielding, holding tight while making the top of cables, medium voltage junction boxes.
- Tighten bundles of wires, control wires, signals....
- Protection of rubber layer for outdoor applications

PERFORMANCE FEATURES

Item	Parameter
Thickness	0.13mm +/- 10%
Tensile Strength	3.5 Kg / 19mm
Elongation Rate	150%
Adhesion to steel	≥ 0.30 Kg/19mm
Adhesion to backing	≥ 0.30 Kg/19mm
Breakdown Voltage	≥ 4.5KV
Application Temperature	0 - 80°C

Note: The specifications in the above table are tested based on RoHS 2.0 standards. However, these parameters are only typical specifications, so they cannot be used as specifications in all cases.

STORAGE CONDITION

Store in room temperature and indoor humidity with storage time is one year.
