

VieTape PE7001

POLYETHYLENE FILM

DESCRIPTION

PE7001 is a Stretch film- low density polyethylene film with exceptional properties. Polyethylene Stretch Film is a thin PE plastic film with excellent stretch to protect products production. This PE film allows the products to be fixed together firmly. Stretch film is often used to wrap pallets before loading. Wrapping tightly together prevents small products from falling off

APPLICATION

PE7001's slightly transparent, does not conduct electricity, is impermeable to water and gases, substances harmful to human health that have many applications in industry:

- o Bundling film (stretch film wraps bundles together)
- o Hand stretch (plastic film is used by hand to wrap manually)
- o Extended core stretch film (plastic film with easy-to-operate handle core)
- o Machine Stretch wrap (Super tough thin film to help operate on pe pallet wrapping machines)
- o Static Dissipative Film (Anti-static pallet protection film)

FEATURES

Item	Parameter	Unit
Color	Slightly transparent	-
Backing	LLDPE	-
Thickness	50	µm
Width, Length	Optional	-
Thickness Tolerance	10%	-

SHELF LIFE

Store in original package in a clean dry place at (10-30 °C) and 40-60% relative humidity.

Shelf life is 1 year form date of manufacture when store at recommended storage condition

The above values are sample observed values, we do not guarantee the actual performance due to the different of application method, bonding design, bonding substrate.. We highly recommend customer to test in the real part

Issue date: September 2022
