

tesa® 60334

Product Information

tesa® 60334 40 µm single sided matte black single sided electrically conductive copper tape

Product Description

tesa® 60334 is matte black single sided electrically conductive copper tape. It consists of electrically conductive matte black copper backing and single sided conductive adhesive coating layer. Designed for EMI shielding for display, FPC, MLB and other components applications.

Product Features

- Excellent matte black appearance
- Excellent electrical conductivity in XYZ-direction
- Excellent EMI shielding performance
- Good bonding strength
- Good heat spreading performance with copper backing

Application Fields

- Display covering and shielding
- MLB shielding
- FPC shielding
- Matte black shielding and covering on component

Technical Information (average values)

Product Construction

- | | | | |
|--------------------|--------------------|----------------------|-------------|
| • Type of adhesive | conductive acrylic | • Color | matte black |
| • Type of liner | PET film | • Color of liner | translucent |
| • Total thickness | 40 µm | • Thickness of liner | 100 µm |

Properties/Performance Values

- | | | | |
|--|------------------------|---|------------------|
| • Contact resistance z-direction (initial) | 0.05 Ohm / square inch | • Surface resistance x-y-direction (adhesive) | 0.1 Ohm / square |
| • Gloss level (60°) | 1.1 GU | • Surface resistance x-y-direction (backing) | 0.1 Ohm / square |
