

# ABITape 9190 Splicing and Masking Tape

## Product Description

ABITape 9190 is a high-performance adhesive tape engineered for versatile performance. It features a specialized adhesive system specifically designed to provide protection and perform exceptionally well in various demanding industrial applications.

## ABITape 9190 Splicing and Masking Tape Features

- **High Temperature Resistance:** Delivers flawless performance in high-temperature conditions and during masking processes.
- **Ultimate Chemical & Fume Protection:** Effectively resists chemicals and fumes.
- **High Tensile Strength:** Offers significant tear resistance suitable for high-speed lines.
- **Aggressive Silicone Adhesion:** Bonds instantly and securely to silicone-treated liners.
- **Residue Free Performance:** Ensures clean removal even after exposure to heat and chemicals.
- **Distinctive Visibility:** Features a bright blue colour for easy and quick identification on the production floor.

## ABITape 9190 Splicing and Masking Tape Applications

- Printed circuit board (PCB) protection.
- High temperature masking applications.
- Powder coating processes.
- Splicing tasks, particularly on high-speed lines and with silicone-treated materials.

## Specification Table

*No detailed technical specification data (e.g., thickness, adhesion to steel, tensile strength values) is provided in the source document.*

## Shelf Life, Warranty, and Package Size

- **Shelf Life:** Information not provided in the source document.
- **Warranty:** Information not provided in the source document.
- **Package Size:** Information not provided in the source document.
